SUBJECT INDEX, VOLUME 52

α-Amino acids, esters, polycondensation, 59
ε-Aminocaprolactam, polymerization by phosphoric acid, 295
Aromatic compounds, polymerization inhibition, 31
Biopolymers, polycondensation, cooperative processes, 231
Block polymers, methods of synthesis, 1
Butyllithium, in vinylcarbazole polymerization, 205
Catalyst, butyllithium, in vinylcarbazole polymerization, 205
carbon dioxide, 59
complex, mechanism of polymerization, 319
insoluble, molecularly disperse, 71
metal compounds, preparation of polyurethans, 305
oxide, polymers of dienes, 159
silico-organic polymer synthesis, 51
titanium tetrachloride, in vinylcarbazole polymerization, 205
Chains, inorganic primary, 257
rings in, new polymer, 97
Chloroprene, emulsion polymerization, 139
Conversion, high, polymerization rate, 85
Copolymerization, cationic, indene, 15
Copolymers, α-methylstyrene and vinylnaphthalene with other vinyl compounds, 63
Crystalline polymers, poly-*p*-xylenes and polyphenylene methyl derivatives, 179
Crystalline polyvinylcyclohexane, synthesis, 199
Cyclic polymerization, divinyl acetals, 189
Decomposition, radical, peranhydrides and peresters, 123
Diamines, interfacial polycondensation, 245
Dicarboxylic acids, interfacial polycondensation, 245
Dienes, *cis* and *trans* polymers, on oxide catalysts, 159
reaction with hexafluorobutadiene-1,3, 23
Divinyl acetals, polymerization, 189
Emulsion polymerization, 139
chloroprene, 131
EPR, macroradical reactivity, 119
Esters, polyacrylic, synthesis and polymerization, 169
Exchange reactions, interchain, radical polymerization, 147
Formaldehyde, polymerization, kinetics, 311
Germanium, in polymers, 55
Graft, methods, 1
polymerization on fresh surfaces, 155
Hexafluorobutadiene-1,3, relative activity with other dienes, 23
Indene, polymerization and copolymerization, 15
Inhibition, of polymerization, by aromatic compounds, 31
Ionic polymerization, mechanism, 277
Kinetics, formaldehyde polymerization, 311
Linear polymers, by polyrecombination, 213
α-Methylstyrene, and vinylnaphthalene, copolymers, 63
Microtacticity, methods of investigation, 77
Organometallic compounds, polymeric organotin, 223
unsaturated, chemical structure and polymerization, 237
Organotin compounds, polymeric, 223
Peranhydrides, radical decomposition, 123
Peresters, radical decomposition, 123
Phosphoric acid, in polymerization of ε-aminocaprolactam, 295
Polyacrylic esters, synthesis and polymerization, 169
Polycondensation, biopolymers, cooperative processes, 231
esters of α-amino acids, 59
heterogeneous, 287
interfacial, fiber formation, 245
interfacial, polyureas, 333
in suspension, 251
Polyfunctional compounds, polymerization, 327
Polyphenylene methyl derivatives, synthesis and properties, 179

Polyrecombination, new linear polymers, 213
Polyureas, interfacial polycondensation, 333
Polyurethans, preparation, metal compound catalysts, 305
Polyvinylcyclohexane, crystalline, synthesis, 199
Poly-*p*-xylenes, synthesis and properties, 179
Potential, changes in redox systems, 39
Radical, decomposition of peranhydrides and peresters, 123
EPR study of reactivity, 119
polymerization, interchain exchange, 147
Rate of polymerization, at high conversion, 85
Reactivity, macroradical, EPR study, 119
Redox systems, changes in potential, 39
Rings, in chains of new polymer, 97
Silico-organic polymers, catalyst, 51
Stereoregular polymers, mechanism of formation, 45
Structure, effect on polymerization of organometals, 237
Surfaces, polymerization and grafting, 155
Titanium tetrachloride, in vinylcarbazole polymerization, 205
Vinyl compounds, copolymers, with α-methylstyrene and vinylnaphthalene, 63
Vinylcarbazole, polymerization, 205
